Physician

This Direct-Hire position is in the Food and Drug Administration, located in various centers throughout the FDA

Open & closing dates: 02/08/2022 to 12/30/2022

Salary: \$159,573 - \$188,634 per year

Pay scale & grade: GP 14

Job family (Series): [0602 Medical Officer](#)

Basic Requirements

A. DEGREE: You must have a Doctor of Medicine, Doctor of Osteopathic Medicine or equivalent from a school in the United States or Canada.

LICENSURE: For all grade levels and positions, applicants must possess a current, active, full, and unrestricted license or registration as a Physician from a State, the District of Columbia, the Commonwealth of Puerto Rico, or a territory of the United States. **You must provide a copy of your medical license with your application.**

Additional requirements for GS-14 -- 4 years of graduate training in the specialty of the position to be filled or equivalent experience and training. Examples of equivalent experience include having knowledge of laws, regulations, and standards that govern medical practices/procedures; and/or in the evaluation, diagnosis and treatment of a wide variety of diseases and medical conditions.

Positions are located in the Department Health and Human Services (DHHS), Food and Drug Administration (FDA) in Prince George's and Montgomery Counties, MD and may be filled in the following Centers:

- **Center for Biologics & Evaluation Research (CBER)** - Applicant will regulate biological products for human use under applicable federal laws, including the Public Health Service Act and the Federal Food, Drug and Cosmetic Act.

- **Center for Drug Evaluation & Research (CDER)** - Applicant will provide regulatory oversight for investigation studies during drug development and making decisions regarding marketing approval for new (innovative or non-generic) drugs, including decisions related to changes to already marketed products.
- **Center for Devices and Radiological Health (CDRH)** - Applicants should possess excellent communication skills including outreach experience as well as experience with medical device surveillance/identification of problems with medical devices.
- **Center for Food Safety and Applied Nutrition (CFSAN)** - Seeking applicants with experience in treating allergic reactions or be well-versed in the medical basis for food allergies.
- **Center for Tobacco Products (CTP)** - Applicants should have direct patient-care related clinical experience. Experience in diagnosis and/or treatment of tobacco-related illness is beneficial and preferred.
- **The Office of the Commissioner (OC)** - Applicant will provide centralized agency-wide program direction in management services for agency programs to ensure that FDA's consumer protection efforts are effectively managed within its regulatory framework.

Duties

- Physicians will support the administration of health programs through a variety of activities. May develop clinical rationale for the coverage of new medical services, devices, and/or diagnostic methods.
- Monitor the post market safety and effectiveness of medical devices and/or drug/tobacco products, food safety and veterinarian medicine marketed and used nationwide.
- Support the administration of occupational health programs and safety and health initiatives, provide associated consultation services. Determine the safety or efficacy of medical products and/or consumer drugs in clinical settings.
- Serve as a technical resident expert on various medical issues and products to include new drugs and tobacco products as well as medical devices, food safety and/or veterinarian medicine.

- May conduct clinical reviews and analyses of the quality of Federal health programs. Provide clinical support for the analysis of potential medical device-related public risks.
- Conduct medical review and evaluation of safety and health regulations, provide medical, toxicological, and epidemiological assistance to support safety and health investigations, etc.
- Design, conduct, and analyze evaluation studies and surveillance projects to measure the effectiveness of scientific public health programs and strategies.
- Establish policies regarding the analysis and interpretation of surveillance or regulation of medical devices, new drugs, generic drugs, and/or tobacco products, etc. and guidelines and performance expectations for staff members.
- Advise on policy guidance, conduct document reviews and interpret legislation affecting medical devices and/or new drugs or tobacco products.
